

VOTE OF CONGRESS AGAINST DR. KOCH

Puts Itself on Record in Opposition to His Views as to Infection from Bovine Tuberculosis.

PRESIDENT ADDRESSES BODY

Thanks the Scientists for Their Labors and Speaks of Great Strides in Conquering Disease.

WASHINGTON, D. C., October 3.—A signal victory was gained to-day by the opponents of the theory advanced by Dr. Robert Koch, the eminent German scientist, minimizing the danger of human infection from bovine tuberculosis, when the sixth triennial international congress on tuberculosis, just before final adjournment, placed itself squarely on record in opposition to the views of the German savant. The controversy over this momentous issue, which has been the subject of spirited debate during the entire proceedings of the congress, reached its climax to-day when that body, by unanimous vote, adopted a resolution recognizing the "possibility" of human infection from the bovine tuberculosis bacilli. The text of the resolution, which was one of a series of official declarations, is as follows:

"Resolved, That the utmost efforts should be continued in the struggle against tuberculosis to prevent the conveyance from man to man of tuberculosis infection as the most important sources of the disease."

"That preventive measures be continued against bovine tuberculosis, and that the possibility of the propagation of this to man be recognized."

This official expression, which was one of the most important results of the session of the congress, was greeted with prolonged cheers. Dr. Koch sat throughout the proceedings without so much as a nod of disapproval. The action of the congress will likely put a quietus to further agitation, at least until the next meeting of the congress in 1911.

President Makes Speech.
One of the most pleasant surprises of the closing scenes of the congress was the appearance for the first time during its proceedings of President Roosevelt. In a characteristic address, President Roosevelt paid a notable tribute to the assemblage of so many scientists of international reputation. The President spoke in part as follows:

"It is difficult for us to realize the extraordinary changes, the extraordinary progress, in certain lines of social endeavor during the last two or three generations; and in no other manifestation of human activity have the changes been quite so far reaching as in the ability to cope with disease. It is not so very long, measuring time by history, since the attitude of man toward a disease such as that of consumption was one of helpless acquiescence in what he considered to be the mandates of a supernatural power. It is but a short time since the most gifted members of the medical profession knew as little as any layman of the real causes of a disease like this, and therefore, necessarily, of the remedies to be invoked to overcome them."

"But, for instance, the work that the United States government is now doing in Panama. The Isthmus of Panama, which was a by-word for fatal disease, has become well-nigh a san-

MEN & BOYS' OUTFITTERS

tarium, and it has become so because of the investigations of certain medical men, which enabled them to find out the real causes of certain diseases, especially yellow fever and malaria, and to take measures to overcome them.

"The older doctors here, when they were medical students, would have treated the suggestion of regarding mosquitoes as the prime source of disease like that as a subject for mirth."

Result of Patient Work.
"These utterly unexpected results have followed patient, laborious, dangerous and extraordinarily skillful work, that has enabled the cause of the disease to be found and the diseases themselves to be combated with extraordinary success."

"At this moment, in the middle of the great continent of Africa, there is a peculiarly fatal and terrible disease, the sleeping sickness; a disease which, if it had been known to our ancestors in the middle ages, would have been spoken of as the 'black death,' was spoken of in the middle ages as a scourge sent of God, possibly as some thing connected with a comet, or some similar explanation would have been advanced. We now know that it is due to the carrying of a small and deadly blood parasite by a species of biting fly."

"And the chance to control that disease lies in the work of just such men as, and indeed of some men who are assembled here, who have come here, however to combat not a scourge confined to the tropics, but what is in the whole a scourge of the people throughout the world. But a few years ago hardly an intelligent effort was made or could be made to war against this peculiarly deadly enemy of the human race. The chance to successfully conduct that war arose when the greatest experts in the medicine world turned their trained intelligence to the task. It remains for them to do out just what can be done."

"I feel that no gathering could take place fraught with greater hope for the welfare of the people at large than this. I thank you all, men and women of this country, and you, our guests."

for what you have done and are now doing, on behalf of the nation, I greet you, and I hope you will understand how much we have appreciated your coming here."

Work of the Congress.
Among the results of the labors of the gathering was the adoption of a resolution recommending the obligatory notification and registration of all cases of tuberculosis; endorsing well-considered legislation for the regulation of factories and workshops; the abolition of premature and injurious labor for women and children; and the securing of sanitary dwellings, so as to increase the resisting power of the community to tuberculosis and other diseases. Other resolutions endorsed instruction in personal school hygiene in all schools; for training teachers; the establishment in colleges and universities of courses in hygiene and sanitation; the establishment of playgrounds as an important means of preventing tuberculosis; the establishment of hospitals for treating advanced cases of tuberculosis; the dispensary and day and night camps for ambulant cases, which cannot enter hospitals and sanatoriums.

Meet Next Time in Rome.
Secretary of the Congress, Cortesouy, presided at the closing session of the congress. The invitation for the congress to hold its next meeting in Rome was extended by Dr. Antonio Stella, representing the general direction of health in Italy, who expressed the confident hope that when the congress meets in Rome it will be to celebrate a memorable scientific triumph over the white plague.

Dr. Lawrence L. Flyck, of Philadelphia, and Abraham Jacoby, of New York, moved the acceptance of the invitation, which was done by a rising vote.

The closing scenes were marked by responses by the representatives of thirty-three nations reflecting the confident hope that medical science will in the not far distant future triumph over the scourge of tuberculosis. Each of the delegates expressed the sentiment that there would be great results achieved by this congress, especially as regards the administrative control of tuberculosis.

MAY RESTORE SALARIES
Baltimore and Ohio May Put Them Back to What They Were.

BALTIMORE, Md., October 3.—The Baltimore and Ohio Railroad Company may be the first of the larger railroad systems in the country to restore salaries to the basic current previous to the slump in business.

"President Muller has been talking the matter over with the heads of the departments, with a view to ascertaining their views, especially with reference to a justification for such a step at this time."

When the depression in business began to seriously affect the revenues of the company, the chief executive decided to cut the salaries of all employees from the president down in excess of \$5,000 a year 10 per cent.

It is now proposed that the restoration shall go into effect on November 1st, but at the general offices of the Baltimore and Ohio positive denial is made that any date had been fixed.

SHERMAN PRAISES BRYAN
Speaking at Commemorative Birthplace He Pays Him High Compliment.

EVANSTON, Ill., October 3.—Long distance records of stump speaking during the present campaign were shattered to-day by James S. Sherman, the Republican vice-presidential nominee, and Congressman Nicholas Longworth, who traveled through two States. The party journeyed almost from the Mississippi River across the northern parts of Illinois, thence south from Chicago to "Big" Rock, the so-called Democratic stronghold, and thence to the birthplace of William J. Bryan.

At Salem, Ill., William J. Bryan's birthplace, in a brief address, Mr. Sherman paid a high tribute to Mr. Bryan, saying: "If as a boy, in his young years, I had known Mr. Bryan, I would have been proud to call him my friend."

Mr. Sherman said that he was a young man in Congress, he must have known many friends in this community."

Mount Vernon, Ill., Mount Vernon, Ind., and Chicago, Ind. and Carmel, speeches were made by both Mr. Sherman and Mr. Longworth. A party committee met Mr. Sherman's party at Mount Vernon and escorted them here, where a big rally was held to-night. Mr. Sherman replied to Mr. Bryan's question, "Shall the people rule?"

SUBMARINES IN RACE FOR PHILADELPHIA CELEBRATION
[Special to The Times-Dispatch.]

NEWPORT, R. I., October 3.—The race of the four submarines, Cuttlefish, Octopus, Tarantula and Viper, from Newport to Philadelphia, which had been delayed on account of the recent storm, was begun this afternoon. The boats, under the command of Lieutenant Charles E. Courtney, and conveyed by a naval tender, left Newport harbor at 1 o'clock this afternoon, and the official start was made about an hour later off Point Judith.

The boats have a run of about 300 miles to the Delaware Breakwater, and as they have been in Newport on account of heavy weather, they will be hurried to Philadelphia to get there in time for the exercises on Monday.

THE WEATHER

MEN NOW WANTED ARE OUT OF REACH

Three Officers Desired as Witnesses in Hains Case Ordered to Other Places.

WILL ASK THEIR RETURN

District Attorney to Request Secretary of War to Have Them Sent Back.

NEW YORK, October 3.—It became known here to-day that three army officers, said to be important witnesses in the Hains murder case and friends of Captain Peter C. Hains, Jr., who is awaiting indictment on the charge of shooting W. E. Annis, have been transferred from Fort Hamilton by order of the War Department to posts outside the jurisdiction of the New York courts. Consequently they will not be available to testify before the grand jury at its session Monday, when District Attorney Darrin is to present the case for indictment. Those officers are Lieutenant Farnsworth, transferred to Fort Stevens, Oregon; and Captain Patten and Lieutenant Andrus to the artillery school at Fort Monroe.

District Attorney Darrin, who withdrew the Hains matter from the consideration of the special grand jury yesterday, because of the absence of "important witnesses," said to-day: "I shall appeal to Washington at once to have the men returned to the jurisdiction of the Queens county grand jury. These men are familiar with the domestic relations of the Hains family. They are important in proving the contention that the murder was deliberate and the work of sane men. Colonel Ludlow, the commanding officer at Fort Hamilton, said this afternoon that Lieutenant Andrews and Captain Patten were ordered away from that post, and reported at the artillery school on Fort Monroe, Va., on August 28th, while Lieutenant Farnsworth went to the Pacific coast on August 1st. He added that as far as he knew the transfers originated at Washington. He denied they could have had anything to do with the Annis case."

Transferred Before Shooting.
WASHINGTON, D. C., October 3.—An investigation made by Captain Carpenter, one of the assistants to General Murray, the chief of artillery, discloses that the orders to Lieutenant Farnsworth, Captain Patten and Lieutenant Andrus, directing their transfer to posts away from the vicinity of New York, were given considerable length of time before the shooting of W. E. Annis.

Secretary Wright said to-night that he had not received any request from District Attorney Darrin for the return of these officers to the jurisdiction of the Queens county grand jury. If their presence is desired and a request to that effect comes to him, the secretary will direct that the officers named comply with it.

HAZED STUDENT MISSING

He May Be in Hiding or He May Have Been Murdered.

LEXINGTON, Ky., October 3.—President Patterson of the State University, said in an interview to-day that while it may be possible that the students would remain silent when questioned by the faculty regarding the mysterious disappearance of Willie E. Smith, the freshman student, who it is believed has been hazed and has been hidden away now for nearly two weeks, he felt certain that the grand jury could get them to lose their tongues.

President Patterson does not mean by this statement that he believes Smith was the victim of any hazing or is being held in captivity by the students. On the contrary, he contends that Smith was not on the grounds the night of the 22d of September, when he left his boarding house for a class meeting. He thinks

"The Blood is The Life."

"Science has never gone beyond the above simple statement of scriptural truth. It has illuminated the statement by given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is 'bad' or impure it is not alone the body which suffers through disease. The brain is also affected, the mind and judgement are clouded, and many an evil deed or impure thought may be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It cures and purifies the blood thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood."

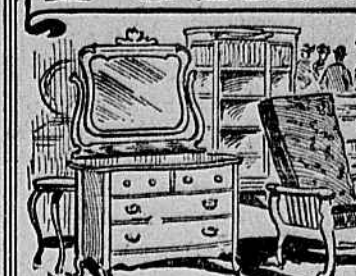

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the 'Golden Medical Discovery' has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of 'Golden Medical Discovery' as a blood cleansing constitutional treatment. If your druggist don't happen to have the 'All-Healing Salve' in stock, you can easily procure it by enclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the 'Golden Medical Discovery.'

You can't afford to accept any medicine of unknown composition as a substitute for 'Golden Medical Discovery,' which is a medicine of known composition having a complete list of ingredients in plain English on its bottle-wrapper, the name being attested as correct under oath. Dr. Pierce's Pleasant Pellets regulate and invigorate the bowels and blood.

MERRY DEL VAL TO REMAIN
Archbishop Ireland Says There Is No Ground for Rumor.

ST. PAUL, October 3.—When asked to-day concerning the story in the Italian paper, the Avanti, now widely circulated through the press of America, to the effect that Cardinal Merry Del Val is soon to resign from the post of secretary of state, being forced to do so by representations coming to the Pope from English and American prelates, Archbishop Ireland said: "The story is a falsehood, made out of whole cloth. The Avanti is an avowed enemy of the Vatican. Invented stories, deliberate falsehoods are its stock in trade, when fact or even appearance of facts are wanting. There is no truth whatever in the saying that Cardinal Merry Del Val is about to resign the papal secretaryship of state."

FIGHT CAUSES DEATH

Anderson M. Newman, wealthy, of Harrisonburg, Victim of Heart Disease.

HARRISONBURG, Va., October 3.—Anderson Moffett Newman, president of the Rockingham National Bank of this place, and one of the wealthiest citizens of this section, died suddenly last night at Coate's store, about fifteen miles from here, heart disease being the cause of his death.

At the time Mr. Newman suffered the fatal stroke he was returning to his home after spending two weeks driving through the mountains of West Virginia. With him at the time were his wife, his daughter, Miss Minnie, and N. T. Thompson, a son-in-law. Two years ago Mr. Newman suffered a stroke of paralysis, but since then his health has grown steadily better. Just prior to the stroke Mr. Newman's team had passed a traction engine in the road and his horses became frightened, though they didn't run away. This seemed to excite Mr. Newman greatly, and he was taken into the home of a relative here, but died before a physician could be summoned.

The deceased was born in Franklin county, near Virginia, December 5, 1839. He was a gallant Confederate soldier, and served from the start up until he was captured at Gettysburg. Mr. Newman is survived by his wife, who was a Miss Ott, and two daughters and one son. The funeral will be held Monday afternoon.

PROCEED TO TANGIER SOUND FOR TARGET PRACTICE

WASHINGTON, D. C., October 3.—The cruiser Prairie, upon its arrival at Hampton Roads about October 5th, will proceed to Tangier Sound, Chesapeake Bay, for target practice. The Prairie is to act temporarily as a target ship for the torpedo-boat vessels on the Atlantic coast during the absence of the Yankee.
